

Stainless Steel Hopper Trolley

This stainless steel hopper trolley is designed for efficient material handling. Its durable construction ensures hygiene and corrosion resistance in food processing plants and pharmaceutical facilities.

Product Overview

Industrial Material Handling Solution

This stainless steel hopper trolley is engineered for efficient and hygienic material handling in demanding environments such as food processing and pharmaceutical facilities. Its robust construction ensures long-lasting durability, while the specialized hopper design facilitates smooth loading and unloading of materials. Designed with mobility and sanitation in mind, it provides a reliable solution for transporting ingredients, waste, or finished products under heavy operational loads.

Construction & Design

Primary Material	Stainless steel
Design Highlights	Corrosion Resistant, Hygienic Design, Heavy-duty Frame, Easy-clean Surface

Operational Details

Mobility

- Heavy-duty casters for stability
- Smooth maneuverability
- Integrated handles for manual handling

Industry Compatibility

Food Processing • Pharmaceuticals • Industrial Manufacturing
