

Stainless Steel Hydraulic Pipe Clamp

These stainless steel clamps provide secure and reliable pipe support in hydraulic systems. Their robust construction ensures durability and resistance to corrosion.

Product Overview

Industrial Hydraulic Pipe Clamps

These professional-grade hydraulic pipe and tube clamps are engineered for permanent installation within demanding hydraulic systems. Designed to DIN 3015 standards, the assembly ensures superior stability and vibration damping. The modular construction includes a durable clamp body, cover plate, weld plate, and hex bolts, providing a secure fit for industrial, mobile, and marine applications.

Technical Specifications

Temperature Ratings

Material	Min Temp	Max Temp
Polypropylene (PP)	-30°C	+90°C
Polyamide (PA)	-40°C	+120°C

Standard	DIN 3015
Pipe Diameter Range	6 - 805 mm

Material Composition

Body Material Options	Polypropylene (PP), Polyamide (PA), Aluminium, Stainless Steel
Hardware Material Options	Carbon Steel (Zinc Coated/Phosphated), Stainless Steel

Assembly Components

Included Components

- Cover Plate
- Weld Plate
- Clamp Body
- Hexagon Bolts
