Product Overview

Corrosion-Resistant Performance

These stainless steel insert bearings are engineered for high-demand environments where hygiene and durability are paramount. Featuring robust construction with precision components, they offer exceptional resistance to rust and chemical exposure. Ideal for food processing, pharmaceutical, and marine industries, these units provide reliable, maintenance-free operation in harsh conditions.

Key Features

Corrosion Resistant, Stainless Steel, Maintenance-Free, Pre-lubricated, Sealed

Series Specifications

Available Series

- SUC200 (201-218)
- SHC200 (201-212)
- SSA200 (201-212)
- SSB200 (201-212)
- SSER200 (201-212)
