

Stainless Steel Mixing Tank with Agitator

This stainless steel mixing tank is designed for efficient mixing and blending of liquids in industrial applications. It features a cylindrical body with a conical bottom, supported by three legs, and includes a top-mounted motor driving the agitator shaft.

Product Overview

Industrial Mixing Solution

This stainless steel mixing tank with an integrated agitator is engineered for demanding industrial environments. Featuring a robust cylindrical body with a conical bottom, it ensures efficient blending and drainage for various liquid processing tasks. Its durable construction makes it an ideal choice for high-standard applications in the food processing, pharmaceutical, and chemical industries.

Technical Specifications

Included Components

- Pressure gauge
- Filling port
- Draining port
- Monitoring ports

Material	High-quality stainless steel
Design Features	Cylindrical body, Conical bottom, Three-leg support
Agitator System	Top-mounted motor with agitator shaft

Application Suitability

Target Industries

Food Processing • Pharmaceutical • Chemical
