

Stainless Steel Pipe Coupling Assembly

This stainless steel coupling assembly is designed for robust and secure pipe connections. The assembly provides a reliable and durable solution for joining pipes of different materials or sizes, with excellent vibration and noise dampening properties.

Product Overview

Industrial Coupling Solutions

These high-quality stainless steel pipe coupling assemblies are engineered for robust and secure connections in industrial and plumbing environments. Designed for superior corrosion resistance and long-lasting performance, they ensure a leak-proof seal for both similar and dissimilar pipe materials. Their flexible design provides excellent vibration and noise dampening properties, making them ideal for fluid handling, HVAC, and process piping systems.

Technical Specifications

Available Drive Configurations

- Type A-Hoop Strip
- Type B-Ear Plate
- Type C-S Clip
- Type A-Reduced Diameter
- Type E-Fast Assembly
- Type F-High
- Type G-CAP
- Type H-High assembly
- Type GHA-High assembly

Operational Benefits

Leak-proof seal • Vibration dampening • Noise reduction • Easy installation

Material Grade

Stainless Steel, Corrosion Resistant, Flexible Rubber Sleeve
