

Stainless Steel Pipe Fitting Assortment

This collection features various stainless steel pipe fittings. The fittings include elbows, tees, reducers, unions, and couplings for diverse connection needs.

Product Overview

Professional Stainless Steel Pipe Fitting Assortment

This comprehensive assortment of stainless steel pipe fittings is designed for robust industrial and residential plumbing applications. The collection includes essential components such as elbows, tees, reducers, unions, and couplings, ensuring versatile connectivity for various pipeline configurations. Engineered for durability and corrosion resistance, these fittings facilitate secure, leak-proof installations across diverse pipe systems.

Material & Compatibility

Material
Stainless Steel

Compatibility Guideline

Fittings should always be made of the same material as the pipes being connected.

Fitting Types

Functional Summary

Fitting Type	Primary Function
Elbow	Changes pipe direction
Tee	Connects three sections at 90 degrees
Reducer	Connects pipes of different sizes
Union/Coupling	Extends pipe runs

Included Components

Elbows, Tees, Reducers, Unions, Couplings
