

Stainless Steel Range Hood with LED Lighting

This stainless steel range hood features LED lighting and an electronic switch. It includes a stainless steel filter, a 150mm outlet, and an adjustable width.

Overview

Professional Stainless Steel Range Hood

This high-performance stainless steel range hood is designed to provide efficient ventilation and sophisticated style for professional kitchen environments. Featuring a powerful 330W motor and a robust airflow capacity of 1000m³/h, it ensures effective smoke and odor extraction. Built from durable 304#/430# stainless steel and tempered glass, this unit offers adjustable width and height options to accommodate various layout requirements.

Technical Specifications

Airflow Capacity

1000 m³/h

Air Volume

Motor Power	330 W
Outlet Diameter	150 mm
Lighting System	LED 3 x 1W

Design and Dimensions

Width Range	600-900mm
Height Adjustment	600-1100mm
Construction Materials	Stainless Steel 304#, Stainless Steel 430#, Tempered Glass

Hardware Features

Control Type	Electronic Switch
Filter Type	Stainless Steel Filter

Logistics

Gross Weight

- 23kg (Standard)
- 10kg (900mm version)
