Product Overview

High-Efficiency Submersible Sewage Pump

This professional-grade submersible pump is engineered from high-quality AISI SS 304 or 316L stainless steel, ensuring exceptional corrosion resistance and durability. It features a robust integrated cutting system designed to efficiently mince long fibers and solids, significantly reducing the risk of blockages. This unit is an ideal solution for reliable wastewater management in residential, commercial, and industrial environments.

Materials & Construction

Material Grade	AISI SS 304, AISI SS 316L

Technical Specifications

Model Specifications

Model	Power	Max Head	Max Capacity	Discharge Size
WQG-1100C	1.1KW (1.5HP)	13m	14 m³/h	65mm
WQG-1500C	1.5KW (2HP)	14m	15 m³/h	65mm

Voltage/Frequency Options

- 220V/50Hz
- 115V/60Hz
- 380V/60Hz
- 127V/60Hz
