Product Overview

Corrosion-Resistant Performance

This stainless steel submersible pump is engineered for durability and longevity in demanding fluid transfer applications. Its robust design is fully corrosion-resistant, making it an excellent choice for seawater and other corrosive media. Integrated with an automatic float switch, the unit provides reliable operation and protection against dry running in environments like cellars, pools, and construction sites.

Technical Specifications

Operating Limits

35 °C

Max Fluid Temperature

40 °C

Max Ambient Temperature

Ratings & Certifications

IPX8 Protection, Insulation Class B/F

Construction

Material Composition

Component	Material
Pump Body	Plastic
Impeller	Plastic
Mechanical Seal	Stainless steel, Ceramic, Graphite
Shaft	45# Carbon Steel / Stainless steel

Key Features

- Stainless steel structure
- Automatic float switch
- Thermal protector (optional)
- Corrosion-resistant casing
