

Stainless Steel T-Bolt Clamps

These heavy-duty T-bolt clamps are made of stainless steel. They provide secure and reliable fastening in demanding applications with a robust T-bolt design, offering high clamping force and resistance to vibration and corrosion.

Product Overview

Heavy-Duty T-Bolt Clamps

These stainless steel T-bolt clamps are engineered for secure and reliable fastening in the most demanding environments. Featuring a robust T-bolt design, they deliver exceptionally high clamping force and offer superior resistance to both vibration and corrosion. They are an ideal solution for critical connections in automotive, industrial, and marine applications where safety and durability are paramount.

Technical Specifications

Material	Stainless Steel
Key Features	High Clamping Force, Vibration Resistant, Corrosion Resistant, Heavy-Duty

Applications

Recommended Industries

- Automotive
- Industrial Machinery
- Marine Applications
