

Stainless Steel Water Pressure Booster Pump

This water pressure booster pump is designed for efficient water transfer and boosting applications. The pump features a robust stainless steel construction.

Product Overview

High-Performance Centrifugal Water Pressure Booster

This stainless steel water pressure booster pump is designed for high efficiency and long-term durability in residential and commercial applications. Engineered with a high-resistance copper wire motor and advanced mechanical sealing technology, the unit provides stable water pressure and consistent performance. The pump body benefits from anti-corrosion electrophoresis treatment, ensuring longevity even in demanding environments.

Certifications

Quality Standards

CE, CSA, ISO 9001, RoHS

Performance Specifications

Technical Data Sheet

Model	Power (kW)	Power (hp)	Max Suction (m)	Max Flow (l/min)
SGJ600	0.6	0.8	9	45
SGJ800	0.8	1.1	9	50

Technical Features

Motor Technology

155 °C

Max Heat Resistance

20 %

Body Strength Increase

35 %

Seal Life Increase

Construction Materials

- Brass Impeller
- Welded stainless steel rotor shaft
- Reinforced nylon fan cover
- Class F copper wire motor
