

Stainless Steel Water Pump

This stainless steel water pump is engineered for efficient water transfer. Its durable construction ensures reliable performance in diverse applications.

Product Overview

Industrial Stainless Steel Water Pump

This professional-grade stainless steel water pump is engineered for high-performance fluid transfer in demanding environments. Operating at a standard 380V/50Hz power supply, the unit offers a wide range of power outputs from 3kW to 45kW to suit various industrial requirements. Built with premium internal components including heavy-duty bearings and a reinforced stator assembly, it ensures long-term operational efficiency and reliability.

Performance Specifications

Efficiency Range

74 %

Min Efficiency

Max Efficiency

Technical Data Table

Power (kW)	Power (HP)	Efficiency (%)	Current (A)	RPM
3	4	74	7.8	2880
5.5	7.5	77	13.6	2860
11	15	79	25.8	2860
22	30	79.5	51.3	2850
45	60	80	103	2850

Rated Power Range

3kW - 45kW (4HP - 60HP)

Construction

Core Components

- Upper guide bearing
- Bearing sleeve
- Winding wire
- Rotor
- Stator
- Lower guide bearing
- Thrust bearing
- Regulating diaphragm

Compliance

Power Standards

380V, 50Hz
