

# Stainless Steel Water Transfer Pump

This stainless steel water transfer pump is designed for various water transfer applications. Constructed with a durable stainless steel housing, it ensures longevity and resistance to corrosion.

## Overview

### Robust Stainless Steel Water Pump

The JDT Stainless Steel Water Pump is a high-performance solution engineered for reliable water transfer in domestic and commercial environments. Featuring a durable stainless steel housing, this pump offers superior corrosion resistance and long-term operational stability. It is an ideal choice for irrigation, boosting water pressure, and general water supply needs, designed for straightforward installation and maintenance.

## Technical Specifications

Housing Material	Stainless Steel
Motor Design	Electric motor with ribbed housing
Mounting	Sturdy black base mount

## Applications

Primary Applications	Domestic Water Supply, Irrigation, Pressure Boosting
----------------------	--

## Key Features

### Performance Highlights

**1 High**

Corrosion Resistance

**1 Simple**

Installation Ease
