

Stair Climbing Hand Trolley

This hand trolley is designed for transporting heavy loads with ease. Its three-wheel design on each side allows smooth navigation on stairs, making it suitable for delivery, moving, and warehouse tasks.

Overview

Robust Stair-Climbing Solution

This durable hand trolley is specifically engineered for transporting heavy loads across various terrains, including stairs. Featuring a specialized three-wheel design on each side, it ensures smooth navigation for delivery personnel, movers, and warehouse staff. Its sturdy steel construction provides a reliable platform for secure handling in both industrial and commercial environments.
