Product Overview

Professional Stamped Metal Speaker Frame

This high-quality stamped metal speaker frame is engineered for reliable performance in audio-video product assemblies. It features a robust circular design with a matte black, corrosion-resistant finish that ensures both durability and a professional aesthetic. With integrated mounting points and optimized cable routing cutouts, this frame offers ease of installation and structural integrity for various acoustic applications.

Technical Specifications

Material & Finish	Stamped Metal, Matte Black Coating, Corrosion Resistant
Model Identifier	102-TB

Design Features

Design Characteristics

- Circular outer rim with mounting points
- Central hub with driver/ventilation holes
- Radial support arm geometry
- Integrated cable routing cutouts
- Terminal block attachment point

Mounting Configuration

Component	Feature
Outer Rim	Multiple screw holes for enclosure mounting
Central Hub	Eight-hole pattern for driver installation
Support Spokes	Integrated terminal block housing
