

Stamped Steel Speaker Baskets

Stamped steel speaker baskets provide a rigid frame for mounting speaker components. They are precision-engineered for optimal acoustic performance and durability.

Product Overview

Stamped Steel Speaker Baskets

These stamped steel speaker baskets provide a robust and rigid foundation for high-quality loudspeaker construction and repair projects. Featuring an open frame design to facilitate efficient airflow and heat dissipation, these units ensure optimal acoustic performance. Engineered for durability, each basket is crafted from resilient steel with protective coatings to withstand long-term use and resist environmental wear.

Technical Specifications

Dimensions Matrix

Model	Size	Hole (mm)	Height (mm)	External Diameter (mm)
EA-ACE001	12"	70	100	310
EA-ACE002	8"	45	58	205
EA-ACE003	6"	60	50	167
EA-ACE004	12"	85	108	311

Material & Build

Design Features

- Open frame architecture
- Multi-point mounting
- Heat dissipation design

Material Composition

Stamped Steel, Corrosion-resistant Coating
