

Standard Definition Cathode Ray Tube Television

This cathode ray tube television has a 4:3 aspect ratio screen. Integrated speakers are located on either side of the display, with a control panel at the bottom front.

Product Overview

Standard Definition CRT Television

This cathode ray tube television offers a reliable viewing experience for legacy video applications. With a classic 4:3 aspect ratio and integrated side-mounted speakers, it is designed for compatibility with older video standards. The unit features a user-friendly front control panel for intuitive operation, making it a functional choice for technical or retro-compatible setups.
