

Standard Definition CRT Television

This is a cathode ray tube (CRT) television. It has a standard 4:3 aspect ratio display.

Product Overview

Standard Definition CRT Display

This standard definition television utilizes traditional cathode ray tube technology to deliver reliable visual output. Designed with a classic 4:3 aspect ratio, it is well-suited for legacy applications or specific monitoring environments. The unit features a durable dark-colored bezel and a stable base, providing a compact footprint for versatile placement.
