

Standing Garment Steamer with Adjustable Pole

This garment steamer features a continuous steam rate and a large capacity water tank. It is equipped with a flexible steam hose, telescopic pole, and hanger attachment for steaming clothes.

Overview

Professional Garment Steaming Solution

This standing garment steamer is engineered for efficient wrinkle removal, featuring a robust 2000W heating element and a generous 1.7L water tank capacity. Designed for versatility, it includes a 1.45M flexible steam tube and a 360-degree rolling hanger, allowing for easy access to garments from any angle. With safety features like an automatic cut-off and a convenient self-cleaning mode, this unit is built for reliable, daily use.
