

Stationary Equipment Stand

This stationary stand provides a robust and stable support structure for various equipment. It is constructed from durable metal and features adjustable leveling feet for enhanced stability on uneven surfaces.

Product Overview

Robust Stationary Equipment Stand

The SD-1 Stationary Type Stand is a professional-grade support structure engineered for maximum stability and durability. Featuring a high-quality powder-coated metal construction, it offers excellent corrosion resistance for long-term use. The design includes adjustable leveling feet to ensure a secure base on any floor surface, making it an ideal choice for diverse industrial and commercial applications.

Technical Specifications

Finish	Powder-coated
Material	Durable metal
Stability Features	Adjustable leveling feet, Central support beam, Rectangular base

Applications

Recommended Use

- Industrial facilities
- Commercial environments
- Home workshops
