

Stationary Screw Air Compressor for Industrial Use

This stationary screw air compressor is designed for industrial applications requiring continuous operation. It features a robust enclosure, user-friendly control panel, and integrated air treatment system.

Product Overview

Industrial Stationary Screw Air Compressor

This stationary screw air compressor is engineered for high-demand industrial environments, balancing energy efficiency with robust performance. The unit features a soundproof enclosure designed to minimize noise and vibration while ensuring continuous, reliable operation. Its integrated air treatment system and direct drive mechanism make it a convenient and environmentally conscious solution for manufacturing and automotive applications.

Key Features

Core Benefits

Energy Efficient, Low Noise Operation, Continuous Duty, Direct Drive, Environmentally Friendly

Technical Details

Performance Metrics

1 Direct

Drive Type

Design Specifications

- Stationary screw design
- Integrated soundproof enclosure
- Digital control panel interface
- Advanced air treatment system
- High-efficiency screw airend

Maintenance and Safety

Compliance and Operational Warnings

- Follow installation guidelines
- Adhere to maintenance schedules
- Use approved replacement parts list
- Observe torque specifications
- Do not remove safety warning labels
