

# Stationary Wood Table Saw

This stationary wood table saw is engineered for precise wood cutting. It features a robust construction, adjustable blade height and angle, and a powerful motor for efficient operation.

## ADDITIONAL IMAGES

## Product Overview

### Professional Stationary Wood Table Saw

This high-performance stationary table saw is engineered for precision wood cutting in professional woodworking environments. The unit features a robust construction with a powerful electric motor and a circular blade mounted on a stable arbor. Designed for versatility, this contractor saw excels at performing accurate rip cuts, crosscuts, and miter cuts for demanding projects.

## Technical Specifications

### Core Components

- Bed
- Worktable
- Longitudinal guide plate
- Transverse guide plate
- Main saw
- Scoring saw
- Transmission system

### Saw Classification

10" Contractor Saw

## Operational Features

### Safety and Maintenance

- Safety guard included
- Integrated dust collection port

### Precision Controls

- Adjustable blade height
- Adjustable blade angle
- Rip fence guide
- Miter gauge

### Cutting Functions

Rip cuts, Crosscuts, Miter cuts
