

Steam Floor Cleaning Machine

This steam floor cleaning machine is a household appliance designed for cleaning floors using steam. Its compact design includes a clear water tank and pivoting head, making it easy to use and suitable for quick and efficient floor cleaning.

Overview

Professional Steam Cleaning

This steam floor cleaning machine offers a chemical-free solution for floor sanitation, utilizing the power of steam for efficient results. Engineered with a compact, lightweight form factor, it ensures ease of maneuverability and storage for any environment. The integrated pivoting head allows for precise navigation, while the transparent water tank provides constant visibility into the remaining water capacity.

Technical Specifications

Model Identification	X6810
Design Features	Lightweight, Compact, Pivoting Head, Transparent Tank
Cleaning Method	High-temperature steam sanitization
Head Configuration	Rectangular
