

Steam Floor Mop for Hard Surfaces

This steam mop is designed for efficient and hygienic floor cleaning. It features a foldable handle for compact storage and easy maneuverability.

Overview

Professional Steam Cleaning

This high-performance steam floor mop is designed for efficient and hygienic maintenance of hard surfaces in both residential and office environments. Featuring a 1500W heating element and an adjustable steam control, it provides deep sanitization for various floor types. The innovative triangular head design ensures effortless cleaning in corners and tight spaces, while the foldable handle allows for compact and convenient storage.
