

Steam Generator Iron with Adjustable Settings

This steam generator iron combines a steam generator's power with a traditional iron's convenience. Its separate water tank allows extended steam production for consistent and efficient ironing.

Product Overview

Professional Steam Management

The HG-212 steam generator iron is engineered to bridge the gap between industrial power and household convenience. Featuring a dedicated external water tank, this unit ensures extended steam production for high-volume ironing tasks. High-pressure steam delivery combined with precise heat management allows professionals to remove stubborn wrinkles across diverse fabric types with ease and efficiency.
