

Steam Generator Ironing System

This steam generator iron features a separate water tank that generates continuous, high-pressure steam. The iron is equipped with a temperature control dial and a durable soleplate for smooth gliding over fabrics.

Product Overview

Professional Steam Management

The Steam Generator Ironing System is a high-performance appliance engineered for both domestic and professional environments. It utilizes a separate, high-capacity water tank to produce consistent, powerful steam for superior wrinkle removal and faster ironing. Designed with ergonomics and safety in mind, it features a stable docking station, secure locking mechanisms, and automatic shut-off functionality.
