

Steam Mop with Detachable Water Tank

This steam mop features a detachable water tank with a 400ml capacity. It can also be used as a handheld steam cleaner with its detachable machine body.

Product Overview

Professional Cleaning Performance

This steam mop is engineered for effective sanitization of hard floor surfaces, combining powerful steam generation with a user-friendly design. It features a detachable water tank for easy maintenance and a high-mobility pivoting head to navigate around furniture with ease. Its lightweight and compact construction ensures that it is both comfortable to operate and efficient to store in professional or residential environments.
