

Steam Shrinking, Labeling, and Steam Generation Packaging System

This industrial packaging system integrates steam shrinking, labeling, and steam generation for bottle packaging applications. The system includes a steam shrinking furnace for applying labels, a labeling machine, and a steam generator.

System Overview

Integrated Packaging Solution

This comprehensive packaging system integrates steam shrinking, precise labeling, and dedicated steam generation into a single, efficient workflow. Designed for high-performance bottle and container packaging, the system ensures professional, durable label application through controlled steam shrinking technology. It is an ideal solution for production lines requiring reliability, consistent output, and streamlined operational efficiency.

System Components

Included Modules

- Steam Shrinking Furnace
- Labeling Machine
- Steam Generator

Primary Application

Bottle Packaging, Container Labeling, Industrial Packaging

Technical Details

Model Identifiers

Component	Model ID
Steam Shrinking Furnace	SB-2000
Labeling Machine	TB-250
