Product Overview

Professional Steam & Vacuum Solution

The All-in-One Vacuum and Steam Mop is an advanced floor care appliance designed to simultaneously vacuum debris and sanitize hard surfaces. By utilizing the natural power of steam, this unit effectively eliminates 99.9% of germs and bacteria during the cleaning process. Its versatile design features a motorized brush head and swivel steering, ensuring seamless maneuverability and efficient performance across various hard floor environments.

Performance Features

Sanitization Efficiency

99.9 %

Bacteria/Germ Elimination

Key Operational Features

- Simultaneous vacuum and steam cleaning
- Speed-heated steam distribution
- Adjustable steam levels
- Motorized brush head
- Swivel steering for maneuverability

Design and Build

Component Overview

Component	Function
Water Tank	Steam generation
Collection Chamber	Vacuumed debris storage
Handle	Ergonomic operation
