

Stearated Abrasive Paper for Dry Sanding

Abrasive paper designed for dry sanding applications. Its open-coat construction resists clogging and extends abrasive life, making it suitable for wood, metal, and painted surfaces.

Product Overview

Professional Stearated Abrasive Paper

This high-quality abrasive paper is specifically engineered for dry sanding applications. Its open-coat construction and stearated coating minimize clogging, effectively reducing friction and heat buildup during operation. These features result in an extended abrasive life and a consistently smoother finish across various surfaces including wood, metal, and painted materials.

Technical Specifications

Coating Type

Non-loading • Open-coat • Stearated

Application Method

Dry Sanding

Suitable Surfaces

Wood, Metal, Painted Surfaces

Available Grades

Available Grit Sizes

- P360
- P380
