

Steel and Aluminum Ladder Gangway

This steel and aluminum ladder gangway provides safe and reliable access in various environments. It is constructed from high-grade steel, ensuring durability and resistance to corrosion.

Overview

Industrial Access Solutions

This range of steel and aluminum ladder gangways is designed for demanding shipbuilding and repair environments. The equipment ensures safe and reliable access for personnel with robust construction, including non-slip surfaces and safety railings. Built to withstand industrial conditions, these solutions provide secure boarding and transit capabilities for various maritime applications.

Product Range

Available Ladder Types

- Steel accommodation ladder
- Aluminum accommodation ladder
- Telescopic accommodation ladder
- Gangway ladder
- Wharf ladder
- Bulwark ladder
- Vertical ladder
- Stainless steel cabin ladder
- A-type ladder
- Pilot rope ladder
- Embarkation rope ladder
- Draft ladder

Equipment

Compatible Winches

Electric winch, Air winch, Rope ladder winch
