

Steel Bar Cutting Machine GQ40

This steel bar cutting machine is engineered for precise and efficient cutting of steel bars. It features a robust cutting blade and a powerful copper motor for reliable performance.

Product Overview

Professional Steel Bar Cutting Solution

The GQ40 steel bar cutting machine is engineered for high-efficiency, precise cutting of steel bars in demanding construction and industrial environments. Featuring a high-strength cutting blade and a robust motor, it delivers clean, accurate cuts while maintaining long-term reliability. Its compact, portable design ensures versatility for both on-site operations and workshop use.

Performance Metrics

Cutting Capacity

40 mm

Max Steel Bar Diameter

Key Features

Core Features

- High-strength cutting blade
- Powerful motor for consistent performance
- Adjustable cutting angles
- Integrated safety guards
- Easy maintenance design

Certifications

Certifications

SGS, CE, Bureau Veritas

Usage

Suitable Environments

Construction Site • Industrial Workshop • On-site Processing
