Product Overview

Industrial Strength Cutting

This high-performance bar cutting machine is engineered for precision and durability in demanding environments like construction sites and metal fabrication workshops. It features a robust design with high-quality components, including a copper motor and a specialized 9crsi blade for consistent results. Built for versatility, it efficiently handles a wide range of materials from carbon steel rebar to flat and square bars.

Technical Specifications

Cutting Capacity by Model

Material Type	GQ40	GQ45	GQ50	GQ55
Plain Bar	16-140	16-145	16-150	16-150
II Class Reinforced Rebar	16-132	16-132	16-140	16-140

Flat Steel Cutting Range	<70x15mm

Key Features

Component Quality

- 10-year durability rated 1.40crmcu gear
- Quenched and tempered protective shell
- Solid head design for maximum structural integrity
- Copper-wound electric motor
- High-strength 9crsi cutting blades

Compliance	CE, SGS, Bureau Veritas
