Overview

American Standard Bow Shackle (G2130)

This American Standard G2130 bow shackle is engineered for heavy-duty lifting and rigging applications. Constructed from high-strength alloy steel, it offers reliable performance and durability in demanding industrial environments. The design features a galvanized body with a distinctively painted bolt, ensuring high visibility and corrosion resistance.

Compliance & Quality

Industry Standards

CE • GS

Certifications

ISO 9001:2008, OHSAS 18001:2007, ISO 14001:2004

Technical Data

Dimensions and Load Capacity

Size (in)	W.L.L (t)	Weight (lbs)
3/16	1/3	0.06
1/4	1/2	0.11
5/16	3/4	0.22
3/8	1	0.33
7/16	1-1/2	0.49

Design Features

Construction

- Galvanized steel body
- Red painted bolt
- High-strength alloy steel
