

Steel C-Clamp

This C-clamp is designed for securing workpieces in industrial and woodworking environments. Constructed from high-strength steel, it provides exceptional durability and clamping force for tasks such as welding and assembly.

Overview

Professional Grade C-Clamp

The GL-2205 C-Clamp is a robust and versatile tool designed for securing workpieces in various industrial and woodworking applications. Constructed from high-strength steel, this clamp offers exceptional durability and clamping force. Its threaded spindle allows for precise adjustments and secure holding, while the swivel pad ensures even pressure distribution and prevents damage to the workpiece.

Key Features

Design Advantages

- High-strength steel construction
- Deep throat design for larger projects
- Threaded spindle for precise adjustment
- Swivel pad for even pressure distribution

Ideal Applications

Welding, Assembly, Woodworking, Industrial

Technical Specifications

Material	High-strength steel
Model Identifier	GL-2205
