

Steel Cash Drawer with Key Lock

This durable steel cash drawer features a stainless steel top panel and a key lock mechanism for enhanced security. It is designed for retail environments and offers a robust solution for managing cash transactions.

Overview

Professional Steel Cash Drawer

The ZQ-170A series is a high-performance cashbox featuring a durable stainless steel enclosure designed for intensive retail environments. It offers wide compatibility through a standard RJ-11 interface and supports global currencies including USD, Euro, and Asian denominations. With a vertical bill case design and industrial-grade materials, it provides a space-saving and secure solution for cash management.
