

Steel Chain Block Hoist

This chain block is a robust lifting device suited for heavy-duty applications. It features durable steel construction and a high-strength alloy steel chain for secure and efficient lifting.

Product Overview

Heavy-Duty Lifting Performance

The Model HSZ-C chain block is a robust and reliable lifting device engineered for demanding industrial environments. Constructed with durable steel and a high-strength alloy steel chain, it ensures secure and efficient operation for construction, manufacturing, and maintenance tasks. The fully enclosed gear mechanism protects internal components from dust and debris, while safety latches on both hooks provide essential load security.

Technical Specifications

Design Advantages

- Compact design for portability
- High-strength alloy steel chain
- Dust-protected gear system

Configuration Options

Various Capacities • Custom Chain Lengths

Material	Steel
Safety Features	Safety Latch (Upper Hook), Safety Latch (Lower Hook), Enclosed Gear Mechanism
