Product Overview

Professional Steel Cutting Performance

This high-performance circular saw blade is engineered specifically for precision cutting of thin steel plate and steel tubing. Built for demanding professional environments, the blade utilizes high-grade materials to ensure clean, efficient cuts and extended service life. Its specialized design offers reliability and consistency across various metalworking applications.

Technical Specifications

Application Compatibility

- Thin steel plate
- Steel tube
- Thin iron

Blade Geometry Angles

- 3°-6°
- 10°-15°

Material Composition

65Mn, SK5 Steel

Professional Grade

Yes
