

Steel Floor Deck Roll Forming Machine

This steel floor deck roll forming machine produces high-quality steel floor decks with precision. It handles various steel coil widths and thicknesses, ensuring consistent forming through advanced control systems.

Product Overview

High-Performance Floor Deck Production

This robust roll forming machine is engineered for the efficient production of high-strength colored glaze steel roof tiles. Designed for industrial reliability, it features a 15KW power system and is capable of handling heavy-duty manufacturing demands. With its user-friendly operation and durable construction, this machine streamlines the creation of precise, uniform steel profiles for modern construction projects.

Technical Specifications

Power Rating

15 KW

Power

380 V

Voltage

Dimensions	16000 x 1200 x 1100 mm
Weight	15 t

Machine Capabilities

Key Features

- High rib roofing capability
- Easy to operate interface
- High strength sheet production
- New condition

Production Capacity	100%
Compatible Materials	PPGI, GI, Colored Glaze Steel

Compliance and Warranty

Certifications

BV

Warranty	1 Year
Service Support	Engineers available for overseas service
