Product Overview

High-Efficiency Production

This industrial roll forming machine is engineered for the high-speed and precise production of steel floor decking profiles. Featuring a robust, heavy-duty frame and an advanced automated control system, it ensures consistent quality and dimensional accuracy for construction projects. The integrated system includes decoiling, leveling, forming, and precise hydraulic cutting for a comprehensive manufacturing workflow.

Machine Type

Full automatic steel floor decking roll forming machine

Technical Features

Processing Capabilities

- Automatic sheet feeding
- Multiple forming stations
- Precise length control
- Automated stacking
- Adjustable for varied material thicknesses

Core Features

Fully Automatic, High Speed, Hydraulic Cutting, Programmable Logic Control, Adjustable Settings

Service & Support

After-Sales Support

Category	Details
Guarantee	1 Year
Technical Support	24 hours via Email, Phone, or Messaging Apps
Training	Factory inspection training or manual/video guides provided
