

Steel Floor Plate Forming Machine

This machine is designed for manufacturing floor plates used in steel structural construction. It features a series of rollers and forming stations to gradually shape the metal into the desired profile.

Overview

High-Efficiency Steel Floor Plate Forming Solution

This industrial-grade roll forming machine is engineered for the precise manufacturing of colored glaze steel roof tiles and structural floor plates. Designed for high-volume production, the system features a robust construction capable of handling demanding material processing requirements. With a 15KW power system and overseas service support, it offers a reliable solution for steel structural construction projects.

Technical Specifications

Power Rating

15 KW

Power Output

| | |
|------------------------|------------------------|
| Operating Voltage | 380V |
| Dimensions (L x W x H) | 16000 x 1200 x 1100 mm |
| Machine Weight | 15 t |

Production Capabilities

Key Machine Features

- High Rib roofing profile capability
- Easy to operate interface
- High strength sheet production
- Designed for steel structural construction

| | |
|----------------------|-------------------------------|
| Production Capacity | 100% |
| Compatible Materials | PPGI, GI, Colored Glaze Steel |

Compliance & Service

Certifications

BV Standard

| | |
|----------------------|---|
| Warranty | 1 Year |
| After-sales Support | Yes |
| Service Availability | Engineers available to service machinery overseas |
