

Steel Garden Fork with D-Handle

This garden fork is constructed from durable steel. It features four tines for digging and turning, along with a D-shaped handle for a comfortable grip.

Product Overview

Heavy-Duty Garden Fork

This robust garden fork is designed for professional and residential landscaping tasks, including soil aeration, compost turning, and planting. Featuring a durable forged carbon steel head with four precision-engineered tines, it offers excellent digging and turning efficiency. The ergonomic poly D-grip handle ensures comfortable control and reduced strain during extended use.
