

Steel Garden Fork

Steel garden forks are designed for efficient material handling in agricultural and gardening applications. They feature durable steel construction and ergonomic handles for comfortable use.

Product Overview

Professional Grade Agricultural Fork

These heavy-duty steel forks are engineered for demanding agricultural and gardening applications, providing exceptional longevity and strength. Featuring an ergonomic handle design to ensure comfort during extended use, the multi-tine configuration allows for highly efficient material handling. This tool is an ideal solution for moving hay, straw, manure, and various other loose materials in professional settings.

Technical Specifications

Common Applications

- Agricultural use
- Gardening
- Material handling
- Moving hay and straw
- Manure management

Material	Steel
Available Model Numbers	F107, F009

Features

Key Benefits

Heavy-duty construction • Ergonomic handle • Multi-tine design • High durability
