

Steel Hand Pick

This steel hand pick is designed for digging and breaking materials. It features a sharpened point and a central eye for handle insertion.

Product Overview

Professional Grade Steel Hand Pick

These professional-grade steel hand picks are engineered for versatility in demanding environments such as construction, landscaping, and heavy-duty gardening. Featuring high-quality steel construction with a precision-sharpened cutting point, each tool is designed to easily break through compacted soil, rock, or other dense materials. Available in multiple head shapes and colors, these picks are essential for field work requiring durable manual excavation tools.

Technical Specifications

Finish Colors

Red • Blue • Black

Material

Steel
