

Steel Hydraulic Quick Coupling

This hydraulic quick coupling is constructed from high-strength steel for durability and corrosion resistance. It features a close-type design to minimize leakage and maintain system pressure.

Product Overview

Robust Hydraulic Connectivity

The ZJ-VF Series hydraulic quick coupling is a versatile, high-strength steel fitting designed for demanding industrial environments. It features a close-type design that minimizes leakage and helps maintain consistent system pressure during operation. This precision-engineered coupling facilitates efficient hydraulic power transmission, making it an ideal choice for heavy-duty construction, forestry, and steel mill machinery.

Technical Specifications

Material	High-strength steel
Design Type	Close-type

Industry Applications

Common Equipment Uses

- Construction equipment
- Forestry equipment
- Hydraulic tools
- Oil field equipment
- Heavy industrial machinery

Suitable Industries	Construction, Forestry, Oil & Gas, Steel Mill Machinery, Industrial Hydraulic Systems
