

Steel Loading Ramps, 183cm

These heavy-duty steel loading ramps are designed for safely loading ATVs, motorcycles, and other equipment onto trucks or trailers. Constructed from high-strength steel, these ramps offer exceptional durability and stability.

Product Overview

Heavy-Duty Steel Loading Ramps

These 183cm steel loading ramps are engineered for reliability and safety when loading equipment into trucks, vans, and trailers. Featuring a highly strengthened steel construction with a corrosion-resistant zinc coating, they are built to withstand frequent use in diverse environments. The design includes non-slip treads and a full-width attaching lip for secure, stable operation during loading tasks.

Physical Dimensions

Total Length	183 cm
Ramp Width	23 cm
Net Weight (Pair)	15 kg

Construction & Design

Safety Features

- Full width plate attaching lip
- Soft foam backing on lip
- Reflective safety label
- 2 Safety Straps included

Construction Details

High-strength steel, Zinc coated finish, Non-slip tread, Corrosion protected
