

Steel Long Tape Measure

The steel long tape measure is a durable and reliable tool for accurate measurements over long distances. It features a robust steel tape and an ergonomic casing for comfortable use and protection.

Product Overview

Professional Series G11 Steel Long Tape Measure

The Series G11 Steel Long Tape Measure is a durable and reliable tool engineered for high-accuracy measurements over extended distances. Featuring a robust steel blade designed for resistance against wear and tear, this tool is ideal for rigorous professional use in construction, surveying, and industrial environments. Its ergonomic casing ensures both a comfortable grip and superior protection for the internal mechanism, while the smooth rewind system allows for quick and efficient operation.

Technical Specifications

Length	30 m
Measurement System	Metric

Certifications and Compliance

Quality Standards	ISO9001, ISO14001, EEC
