

Steel Mobile Phone Component Set

High-strength steel components provide robust performance and durability. The set includes a tapered shaft, threaded end, and securing nuts, suitable for various mobile phone applications.

Product Overview

High-Strength Steel Components

This Steel Mobile Phone Component Set is engineered for robust performance and long-lasting durability in demanding environments. Featuring a precision-designed tapered shaft and threaded end, these components are built to ensure reliable connectivity and structural integrity. The set includes securing nuts and is available in multiple sizes to accommodate various mobile phone assembly requirements.

Technical Specifications

Material	High-strength steel
Key Features	Tapered shaft, Threaded end, Securing nuts included, High durability
Size Options	Multiple sizes available

Application

Primary Use	Mobile phone assembly and repair
