

Steel Plate Roll Forming Machine

This steel plate roll forming machine is engineered for the efficient and precise shaping of steel plates. Its robust construction, advanced automation, and customizable roll forming configurations support diverse manufacturing needs.

Overview

High-Efficiency Steel Plate Roll Forming Machine

This professional-grade roll forming machine is engineered for the precise and efficient production of steel roof and wall panels. Featuring robust construction and reliable performance, it is designed to meet the high-throughput demands of modern steel construction projects. With a compact footprint and automated operation, this machine ensures consistent quality for your structural component manufacturing needs.

Technical Specifications

Power Rating

5.5 kW

Motor Power

10 m/min

Making Speed

Electrical Requirements

380V, 3 Phase

Dimensions & Build

Dimensions (L x W x H)

6600 x 1400 x 1300 mm

Usage & Application

Primary Applications

Roof Panels, Wall Panels, Steel Construction

Compliance & Support

Certifications

BV Certified

Warranty & Support

- 1-year warranty
- Overseas engineering support available

Logistics

Shipping & Delivery

Category	Details
Packaging	Full Container Load
Delivery Time	60 days
