

Steel Platform Trolley

This heavy-duty steel platform trolley is designed for transporting heavy loads in industrial and commercial environments. It features a robust steel platform with a non-slip surface, a sturdy handle, and four swivel casters for smooth rolling and enhanced stability.

Product Overview

Heavy-Duty Industrial Transport

This heavy-duty steel platform trolley is engineered for efficient material handling in demanding industrial and commercial environments. Built with a robust steel platform and a non-slip surface, it ensures safety and stability when transporting heavy loads. The design includes a sturdy handle for ergonomic maneuvering and four swivel casters to facilitate smooth, reliable movement across warehouse and factory floors.

Technical Specifications

Mobility Features

- Four swivel casters
- Ergonomic handle

Construction Material	Steel
Surface Finish	Non-slip

Applications

Ideal Environments	Warehouses, Factories, Delivery Services, Industrial Facilities
